Visit w3schools and go to the HTML Tutorial: https://my-learning.w3schools.com/tutorial/html
   Introduction and Basics Lessons 1.1 - 1.7
   1. Formatting and Style Lessons 2.1-2.6, 2.8 - 2.22
   2. Links Lessons 4.1 - 4.3
   3. Forms Lessons 10.1 - 10.6
   4. Visit w3schools and go to the JavaScript Tutorial: https://my-learning.w3schools.com/tutorial/js
   5. Introduction Lessons 1.1 - 1.7
   6. Variables Lessons 2.1 - 2.4
   7. HTML DOM Lessons 22.1 - 22.14
   Visit w3schools and go to the CSS Tutorial: https://my-learning.w3schools.com/tutorial/css
   2. Introduction Lessons 1.1 - 1.6
   3. Links Lesson 11.1
   4. Lists Lesson 12.1
   Selectors 16.1 - 16.5
   5.
Guide: 6.
   8.

Make sure you're in the main branch locally and `git pull origin main` any pending changes
Make a new branch per the recommended branch name below (git checkout -b ...)
Fill in the items in the worksheet below (save as often as necessary)
Once finished, export the worksheet
Add the output file to any location of your choice in your repository folder
Check that git sees it via `git status`
If everything is good, continue to submit
   Track the file(s) via `git add`
   Commit the changes via `git commit` (don't forget the commit message)
   Push the changes to GitHub via `git push` (don't forget to refer to the proper branch)
   Create a pull request from the homework related branch to main (i.e., main <- "homework branch")
   Open and complete the merge of the pull request (it should turn purple)
   Locally checkout main and pull the latest changes (to prepare for future work)
Take the same output file and upload it to Canvas
   *This step is new since GitHub renders the PDF as an image the links aren't clickable so this method works better
   *Remember, the github process of these files are encouragement for your tracking of your progress

Reflection (2.5 pts.)

^COLLAPSE ^

^COLLAPSE ^

Task #1 - Points: 1

Text: Reflect on the topics and refer to the checklist of this task

Checklist   *The checkboxes are for your own tracking

#	Points	Details
☐ #1	1	Mention specifics of what concepts/topics were totally new to you.
☐ #2	1	Mention specifics of what concepts/topics you already knew.
☐ #3	1	Mention specifics of any topics you still don't feel confident about. If everything makes sense so far you can mention so.
☐ #4	1	At least a few reasonable sentences.

Response:

I had already worked a bit with all 3 languages in the past so a lot of topics were familiar to me. Specifically, the syntax for HTML links was something I had worked with a bit in the past for a project. The newer topics to me were related to JavaScript. I used HTML and CSS before, CSS mainly for styling purposes. From reading about JavaScript, I learned a lot about "HTML DOM". I got familiar with the tree, and the different things JavaScript can do such as change all the HTML and CSS elements in the page. Overall, everything has made sense to me so far.
